

Salute to old friends!

For 28 years, (the A2 round handled) One Piece Range of knives has been an essential part of Chris Reeve Knives. From Chris first designing the concept while serving in the South African Army in Namibia to today, these knives have been used, carried, admired and collected in all corners of the world.

An integral part of the success of this range has been Eddie Myers. Eddie was Chris's foreman when Chris was an apprentice tool and die maker. They have known each other more years than they care to count and Chris has always regarded Eddie as mentor, teacher, friend and consultant! For 25 years, Eddie has machined the blanks for our One Piece Knives. Still living in South Africa, Eddie and his wife Caroline, have provided fine service to deliver the best blanks at the best price. (There is no question that the volatility of the South African currency has helped over the years!)

Eddie and Caroline want to retire—Ed wants to buy a boat again and go fishing whenever he feels like it! This brought us to a cross-roads—do we try to source a vendor in the USA or should we simply retire a “Classic”. We have decided to take the second choice—to discontinue the One Piece Range. We will accept orders for One Piece models until December 1, 2009—filling those orders will take into 2010. We reserve the right to limit quantities ordered.

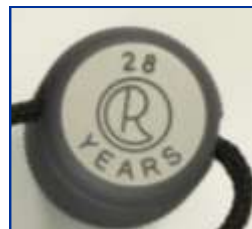

Anne with Oliver, Caroline, Eddie, and Chris with Tombi , during the Myers visit to Boise— Summer 2008

Retail price: \$400

Commemorative Mk

To celebrate the end of this era, we are offering a limited edition of **250 Commemorative Mk IVs**. The Mk IV was the first iteration of the one piece concept to become known—there is still call for this model which we initially discontinued in 1995. It has a 7 inch blade with a clip point and sawback. For this commemorative edition, the butt cap is engraved and polished and the sheath has a commemorative logo embossed. **We are taking orders and will be ready to ship early November.**
